LSESU Data Science Society - Give It A Go

Agenda

- (10min) Who we are
- What is data science and why you should care (what is big data, what is data science and how it is used, examples - descriptive, predictive, prescriptive analytics?), what is machine learning
- (15min) DEMO - 5 mins * 3 examples (econ, light hearted)
- (10min) How to get started: data science tools and languages
- Roles and opportunities - data analyst, data scientist, data engineer, other roles that use data science skills, list common industries - see time 18:00 onwards of CFG SQL webinar
- (15min) What we do and why you should join us
- Meet the committee and join our team - subcommittee recruitment!
- Next steps: society survey, upcoming events, projects sign-ups
- (10min) Summary and Q&A

LSESU Machine Learning (Data Science) Society

- Founded in 2017, originally centered around "machine learning" specifically
- Rebranding to expand focus on Data Science, and tech in general
- Goal: expose the LSE community to data science and technology

What is Data Science... and why you should care
